DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shiki(5,406,308).

As to claims 1 and 3, Shiki(5,406,308) teaches an LCD display comprising the steps of: receiving a data signal(HSYNC) for indicating a time interval when a video data exists; detecting an enable initiation time of the data enable signal(HSYNC); generating a reset signal(HSET) at the enable initiation time of data signal(HSYNC) and resetting a source shift clock signal for sampling video data(see figures 1-2, 11-14; column 3, lines 30-40 and column 5, lines 7-43).

It would have been obvious to a data signal(HSYNC) as a data enable signal since a data signal(HSYNC) causes the time generating circuit(10) to generate a reset signal(HSET)(see figures 11-12 and column 5, lines 17-21).

3. Claims 2 and 4-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shiki(5,406,308) and Sekido et al(5,999,158).

Application/Control Number: 10/022,854

Art Unit: 2673

Shiki fails to disclose a source driving circuit for latching video signal after sampling.

Sikido et al teach a source driving circuit having a latching circuit(4) for latching sampling video signal(see figure 4; column 3, lines 61-68 and column 4, lines 1-4). It would have been obvious to have modified Sekido et al with the teaching of Shiki, so as to transfer sampling data signal to an LCD display panel(see column 4, lines 2-4).

Allowable Subject Matter

4. Claims 6-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments filed on May 11, 2004 have been fully considered but they are not persuasive.

Applicant argues that Shiki is completely silent with respect to a method of the steps of "generating a reset signal at said enable initiation time of data signal or "a reset signal generator for detecting an enable initiation time of a data enable signal for indicating a time interval when a video data exists to generate a rest signal" and resetting a source shift clock signal for sampling the video data in

Application/Control Number: 10/022,854

Art Unit: 2673

response to the reset signal" on pages 2 and 3. The examiner disagrees with that since Shiki teaches the steps of generating a reset signal(HSET) at said enable initiation time of data signal or a reset signal generator for detecting an enable initiation time of a data enable signal for indicating a time interval when a video data exists to generate a rest signal (see figures 11, 12 and column 5, lines 4-34) and resetting a source shift clock signal(HS) for sampling the video data in response to the reset signal(HSET)(see figures 1-3; column 2, lines 59-68 and column 3, lines 1-51).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Mametsuka(6,417,847) teaches a shift clock signal generator(2) comprising D Flip-flop, an inverter(10) and an AND gate(8).

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be

'Application/Control Number: 10/022,854

Art Unit: 2673

calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lun-yi, Lao whose telephone number is (703) 305-4873.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bipin Shalwala, can be reached at (703) 305-4938.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks Washington, D.C. 20231

or faxed to:

(703) 872-9314 (for Technology Center 2600 only)

Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal Drive, Arlington, VA, Sixth Floor (Receptionist).

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Technology Center 2600 Customer Service Office whose telephone number is (703) 306-0377.
